

## Are you looking for a better blood bank workflow?

Choose software solutions for laboratory blood banks and transfusion services from the global leader in healthcare IT: SCC Soft Computer.

SoftBank®—SCC's blood bank and transfusion service information management system—provides critical safety functions throughout the system. A wide range of exceptional features streamlines many of the routine, manual, and time-consuming tasks associated with blood bank and blood donor protocols. A major asset to the laboratory, SoftBank allows users to focus on what's important: providing safe blood components, tissue, and derivative products to their patients.

SoftBank: Safe blood products for your diverse needs.

**SCC's Blood Services Information Systems Suite®**  
**SoftBank® • SoftDonor® • SoftID.Tx®**

An authorized IBM Business Partner since 1991, SCC Soft Computer offers systems that run on the IBM Power Systems – Power Architecture-based server line. SCC Soft Computer's robust laboratory and genetics information system software solutions are powered by IBM's AIX – Power Series platform.
